Manual de cámara canon eos rebel t3 en español. Manual de camara canon eos rebel t3 en español. Canon eos rebel t3 manual español pdf.

Storing the battery after it is fully charged can lower the battery's performance. 46Feature Guide
Mode The captured images are recorded onto the card. Make sure the card's write-protect switch is set upward to enable writing/erasing. 1 Slide the lever as shown by the arrows and open the cover. 2 Insert the end with the battery contacts. In low or high temperatures, the LCD monitor display may seem slow or it might look black. 552 Shooting Portraits. The subject should be at least 1 meter/3.3 feet away from the camera. 605 Shooting Moving Subjects. For safety reasons, recharging in low temperatures (6°C - 10°C / 43°F - 50°F) will take a longer time (up to 4 hours). LC-E10/LC-E10E Page 21 27Charging the Battery Upon purchase, the battery is not fully charged. Recharge the battery before using. Pressing the shutter button halfway does not focus the subject. If the focus mode switch on the lens is set to (Manual Focus), set it to (Auto Focus). When flash was used, the bottom part of the picture came out unnaturally dark. The subject was too close to the camera, and a shadow was created by the lens barrel. They do not affect the images recorded. Never leave the camera near anything having a strong magnetic field such as a magnet or electric motor. In low light, the built-in flash fired a series of flashes. Pressing the shutter button halfway may trigger the built-in flash to fire a series of flashes to assist autofocus. Store the card in a case. 26Installing and Removing the Battery and Card. 155Adjusting the LCD Monitor Brightness Todos los derechos reservados. The camera is not waterproof and cannot be used underwater. Page 11 Installing and Removing the Battery and Card 30When the access lamp is lit or blinking, it indicates that images are being written to or read by the card, being erased, or data is being transferred. 34Attaching and Detaching a Lens © Copyright 2022 Manual.pe. High temperatures can cause the camera to malfunction. 5Contents at a Glance 3Conventions Used in this Manual If a hood has been attached to the lens, remove it before taking the flash picture. FAQ Page 7 52Depending on the scene, position the subject toward the left or right to create a balanced background and good perspective. In the (Full Auto) mode, while you press the shutter button halfway to focus a still subject, the focus will be locked. Press the shutter button halfway, and the camera will focus the subject. 171Manual Sensor Cleaning Do not drop it or subject it to physical shock. Using it with an incompatible battery charger or product may result in malfunction or accidents for which Canon cannot be held liable. Page 22 28Load a fully-charged Battery Pack LP-E10 into the camera. Corroded contacts can cause camera misoperation. The Battery Pack LP-E10 is dedicated to Canon products only. Also avoid using or leaving the camera near anything emitting strong radio waves such as a large antenna. When not using the camera, remove the battery. If the battery is left in the camera for a prolonged period, a small amount of power current is released, resulting in excess discharge and shorter battery life. Press the button to exit Live View shooting. 156File Numbering Methods 144Menu Function Settings 160Auto Rotation of Vertical Images 18Charging the Battery on the LCD monitor. 14Quick Start Guide Insert the battery until it locks in place. 3 As shown in the illustration, face the card's label side toward the camera back. The card (sold separately) can be an SD, SDHC, or SDXC memory card. If the camera or memory card is faulty and the images cannot be recorded or downloaded to a computer, Canon cannot be held liable for any loss or inconvenience caused. Copyright laws in your country may prohibit the use of your recorded images of people and certain subjects for anything but private enjoyment. Pull the strap to take up any slack and make sure the strap will not loosen from the buckle. Nuestra base de datos contiene más de 1 millón de manuales en PDF, de más de 10,000 marcas. To turn on the camera again, just press the shutter button halfway (p. 39). If the LCD monitor is left on for a prolonged period, screen burn-in may occur where you see remnants of what was displayed. The subject should be within 5 meters/16.4 feet from the camera. 8Handling Precautions Do not store the card in hot, dusty, or humid locations. Lens After detaching the lens from the camera, attach the lens caps or put down the lens with the rear end up to avoid scratching the lens surface and electrical contacts. If you use continuous shooting, Live View shooting, or movie shooting for a prolonged period, the camera may become hot. Shooting mode (Sample) Quick Control (Sample) Under the [6] tab, select [Feature guide], then press . To display the image again, press the button (p. 70). 2 sec. Wipe off any water droplets with a dry cloth. 163Reverting the Camera to the Default Settings. Insert the card straight in all the way. 4 Press the cover until it snaps shut. When you set the power switch to , the number of possible shots (p. 32) will be displayed on the LCD monitor. Strong magnetic fields can cause camera misoperation or destroy image data. To delete an image, see "Erasing Images" (p. 196). However, the image data may be destroyed or the card or camera may be damaged. • Removing the card • Removing the battery. • Shaking or banging the camera around. Avoid storing the camera where there are corrosive chemicals such as a darkroom or chemical lab. If the error persists, use a different card. 154Setting the Image Review Time After disconnecting the charger's power plug, do not touch the prongs for at least 3 sec. 179Setting Ratings X Recharging starts automatically and the charge lamp turns orange. X When the battery is fully recharged, the full-charge lamp will turn green. It takes approx. You can change the auto power-off time with [5 Auto power off] (p. 155). If you set the power switch to while an image is being recorded to the card, [Recording ..] will be displayed and the power will turn off after the card finishes recording the image. 38Q Quick Control for Shooting Functions 184k Playing Movies 126z Menu Function Settings To shoot while looking at the LCD monitor, see "Live View Shooting" (p. 121). 54C Creative Auto Shooting 62Q Quick Control 16Nomenclature You can then recompose the shot and press the shutter button completely to take the picture. Also be aware that certain public performances, exhibitions, etc., may prohibit photography even for private enjoyment. This camera is compatible with SD memory cards, SDHC memory cards, and SDXC memory cards. 145Handy Features This is called "focus lock". 176u/y Magnified View 3 fps continuous shooting, Live View shooting, and High-Definition (HD) movie shooting. The camera is highly responsive for shooting at anytime, provides many functions fitted for advanced shooting, and offers many other features. With a digital camera, you can immediately view the image you have captured. 155Creating and Selecting a Folder If there is condensation, remove the lens, card and battery from the camera, and wait until the condensation has evaporated before using the camera. You can then better understand the camera. To avoid botched pictures and accidents, first read the "Safety Warnings" (p. 259, 260) and "Handling Precautions" (p. 14, 15). After shooting, playback and check whether the images have been properly recorded. 180Q Quick Control During Playback 178n Rotating the Image 42Formatting the Card 6Index to Features This is to avoid damaging the camera. If you are too close to the subject, move away and try again. 167Appending Dust Delete Data If you have not used the camera for some time or if there is an important shot coming up, have the camera checked by your Canon dealer or check the camera yourself and make sure it is working properly. Page 17 15Handling Precautions Although the LCD monitor is manufactured with very high precision technology with over 99.99% effective pixels, there might be a few dead pixels among the remaining 0.01% or less pixels. Page 2 2The EOS REBEL T3/1100D is a high-performance, digital single-lens reflex camera featuring a fine-detail CMOS sensor with approx. If the built-in flash has popped up, you can push it back down with your fingers. AF point Focus confirmation light Page 6 511 Fully Automatic Shooting The focus confirmation light blinks and focus is not achieved. Aim the AF point over an area having good contrast, then press the shutter button halfway (p. 39). When the access lamp is lit or blinking, do not open the card/battery compartment cover and never do any of the following. If the camera has not been used for an extended period, test all its functions before using it. 166Setting the Flash 94Depth of Field 1000 y Setting Exposure Compensation (Auto Lighting Optimizer) 107Correcting the Image's Dark Corners 108A Customizing Image Characteristics (Picture Style) 110A Registering Preferred Image Characteristics (Picture Style) 113B: Matching the Light Source (White Balance) 1152 Adjusting the Color Tone for the Light Source 117Setting the Color Reproduction Range (Color Space) 119A Shooting with the LCD Monitor 122Page 14 Contents 12678 Shooting Function Settings 166Changing the Shooting Settings Screen Color Do not charge any battery other than a Battery Pack LP-E10. 128MF: Focusing Manually Es muy fácil: simplemente escribe el nombre de la marca y el tipo de producto en la barra de búsqueda y podrás ver instantáneamente el manual de tu elección en línea de forma gratuita. 616 Shooting Portraits at Night Select [Disable], then press Shooting function Live View shooting Playback Please purchase it separately. Page 3 25Attaching the Strap Pass the end of the strap through the camera's strap mount eyelet from the bottom. Even while the camera is in storage, press the shutter button a few times once in a while to check that the camera is still working. For stubborn dirt, take the camera to the nearest Canon Service Center. 173H I Searching for Images Quickly 583 Shooting Landscapes The time required to recharge the battery depends on the ambient temperature and the battery's charge level. While reading this manual, take a few test shots and see how they come out. 162B Checking Camera Settings 471 Fully Automatic Shooting Press the shutter button halfway to focus. X When focus is achieved, the AF point will turn green and the beeper will sound. X If necessary, the built-in flash will pop up automatically. 3 Press the shutter button completely. X The picture will be taken and the captured image is displayed on the LCD monitor. X After the image review ends, the camera will return to Live View shooting automatically. Never attempt to disassemble the camera yourself. Aiming the center AF point over the subject will make focusing easier. 3 Press the shutter button halfway, and the lens focusing ring will rotate to focus. X The dot inside the AF point achieving focus flashes briefly in red. Do not subject it to excessive force, physical shock, or vibration. The eyepiece cover is also attached to the strap (p. 229). Eyepiece cover Page 4 5 For first-time DSLR users, Chapters 1 and 2 explain the camera's basic operations and shooting procedures. Chapters Introduction 2 Getting Started 25 Basic Shooting and Image Playback 49 Creative Shooting 71 Advanced Shooting 91 Shooting with the LCD Monitor (Live View Shooting) 121 Shooting Movies 139 Handy Features 153 Image Playback 175 Printing Images 201 Customizing the Camera 215 Reference 225 Software Start Guide 269 Quick Reference Guide and Instruction Manual Index 273589023 Page 5 5012 All the AF points will be used to focus, and generally the closest object will be focused. The Feature guide turns off when you further proceed with any operation. 335selecting the Interface Language Do not touch the card's electronic contacts with your fingers or anything metallic. When you want to take the picture, press the shutter button completely. However, this is only temporary and will disappear when the camera is left unused for a few days. The beeper continues to beep softly. If the card already contains recorded images, the image number might not start from 0001 (p. 158). It will return to normal at room temperature. To protect the card and its recorded data, note the following: Do not drop, bend, or wet the card. See page 272 for instructions to look up manuals in the Viewfinder 10 31 If the date/time setting screen appears when you turn on the power switch, see page 33 to set the date/time. : The camera turns on. : The camera turns off and does not operate. 140 Shooting Function Settings At the same time, the beeper will sound and the focus confirmation light in the viewfinder will light. X If necessary, the built-in flash will pop up automatically. 4 Press the shutter button completely to take the picture. X The captured image will be displayed for approx. If the camera is suddenly brought in from the cold into a warm room, condensation may form on the camera and internal parts. Do not leave the camera in excessive heat such as in a car in direct sunlight. Recharge the battery on the day before or on the day it is to be used. Even during storage, a charged battery will gradually drain and lose its power. To view the images captured so far, see "Image Playback" (p. 70). Do not attach any portable voltage transformer to the battery charger. 12.2 effective megapixels, DIGIC 4, high-precision and high-speed 9-point AF, approx. ¿Buscas un manual? Page 26 47 The Feature guide is a simple description of the respective function or option. Store the battery with the protective cover (provided) attached. Although this is not a malfunction, holding the hot camera for a long period can cause slight skin burns. Besides dust entering the camera from outside, in rare cases lubricant from the camera's internal parts may adhere to the front of the sensor. If condensation forms on the camera, do not use the camera. If the battery becomes exhausted quickly even after being fully charged, the battery has reached the end of its service life. Purchase a new battery. After recharging the battery, detach it and unplug the charger from the power outlet. This is called AF-assist beam. Doing so can damage the battery charger. When you select a function or option on the camera, the Feature guide description is displayed. 4 Chapters 186X Editing a Movie's First and Last Scenes 501 Full Auto Techniques Set to this position when not using the camera. (The focus confirmation light does not light.) It indicates that the camera is focusing continuously on a moving subject. Page 12 1021Item Check List The camera contains precision electronic circuitry. 154Setting the Auto Power-off Time Do not store or use the card near anything having a strong magnetic field such as a TV set, speakers, or magnet. This is called Live View shooting. 44Switching the LCD Monitor Display Also avoid places prone to having static electricity. Do not touch the card's contacts with your fingers or metal objects. If necessary, attach a commercially-available plug adapter for the respective country or region. Page 8 531 Full Auto Techniques By pressing the button, you can shoot while viewing the image on the camera's LCD monitor. 154Card Reminder To save battery power, the camera turns off automatically after about 30 seconds of non-operation. Then pass it through the strap's buckle as shown in the illustration. As long as you keep aiming the AF point on the subject while pressing the shutter button halfway, the focusing will be continuous. Its effective range is about 4 meters/13.1 feet. 154Silencing the Beeper If necessary, the built-in flash will pop up automatically. 8 Press the shutter button completely to take the picture. 9 The captured image will be displayed for approx. To detach the battery, follow the above procedure in reverse. 3 As shown by the arrow, flip out the battery charger's prongs and insert the prongs into a power outlet. If the camera has been exposed to salty air, wipe it with a well-wrung wet cloth. Although flash was used, the picture came out dark. The subject was too far away. 28Turning on the Power It is displayed when you change the shooting mode or use the Quick Control screen to set a shooting function. Live View shooting, movie shooting, or playback. (The LC-E10E comes with a kit you purchased a Lens Kit, check that the lens is included. Battery Pack LP-E10 (with protective cover) Battery Charger LC-E10/LC-E10E Interface Cable EW-200D Camera (with eyecup and body cap) EOS DIGITAL Solution Disk (Software CD-ROM) Software Instruction Manual (CD-ROM) Camera Basic Instruction Manual Camera Instruction Manual (CD-ROM) PDF files. If you accidentally drop the camera into water, promptly consult your nearest Canon Service Center. The card may then return to normal. Focus lock is also possible in other Basic Zone modes (except Sports). In the (Full Auto) mode, if the subject moves (distance to camera changes) during or after you focus, AI Servo AF will take effect to focus the subject continuously. For details, see page 121.1 Press the button. X The Live View image will appear on the LCD monitor. 2 Aim the center AF point < > on the subject. This manual will refer to all these cards as just "card." The camera does not come with a card for recording images. Although it is daylight, the flash popped up. For a backlit subject, the flash may pop up to help lighten the subject's dark areas. Sometimes multiple AF points flash simultaneously. This indicates that focus has been achieved at all those AF points.
